## § 02 Analytical Results

Qualitative and Quantitative chemical analysis by Liquid Chromatography Tandem Mass Spectrometry (LC-MS/MS)

|                         | SPECIFICATION | RESULT   | STATUS      |
|-------------------------|---------------|----------|-------------|
| Compound Test:          | GHK-Cu        | GHK-Cu   |             |
| Net Peptide Content:    | 50.00 mg      | 57.59 mg |             |
| Peptide Label Accuracy: | ≥ 90 %        | 115.2 %  | <b>PASS</b> |
| Chromatographic Purity: | ≥ 98 %        | 99.4 %   |             |

Chromatographic purity is the target peptide's HPLC-MS/MS principal component analysis, expressed as a percentage of total integrated peak area (Ph. Eur. 2.2.46) — it bounds peptide-related impurities only, not excipients, counter-ions, or residual water, and is separate from net peptide content. — indicates not determined.
